Automation of Reports and Consolidated Orders System (ARCOS)

What is ARCOS and What Does it Do?

The Controlled Substances Act of 1970 (§ 827) created the requirement for Manufacturers and Distributors to report their controlled substances transactions to the Attorney General. The Attorney General delegates this authority to the Drug Enforcement Administration (DEA).

ARCOS is an automated, comprehensive drug reporting system which monitors the flow of DEA controlled substances from their point of manufacture through commercial distribution channels to point of sale or distribution at the dispensing/retail level - hospitals, retail pharmacies, practitioners, mid-level practitioners, and teaching institutions. Included in the list of controlled substance transactions tracked by ARCOS are the following: All Schedules I and II materials (manufacturers and distributors); Schedule III narcotic and gamma-hydroxybutyric acid (GHB) materials (manufacturers and distributors); and selected Schedule III and IV psychotropic drugs (manufacturers only).

ARCOS accumulates these transactions which are then summarized into reports which give investigators in Federal and state government agencies information which can then be used to identify the diversion of controlled substances into illicit channels of distribution. The information on drug distribution is used throughout the United States (U.S.) by U.S. Attorneys and DEA investigators to strengthen criminal cases in the courts.

ARCOS/SORS Online: Add NDC Form

The DEA uses 11 digit NDC numbers, in the 5-4-2 format (e.g. 12345-6789-01)
Shorter forms should pad zeros to the LEFT.

Examples of properly formatting an NDC:

Original = 1234-0123-01	Original = 12345-123-01	Original = 12345-0123-1
ARCOS = 01234-0123-01	ARCOS = 12345-0123-01	ARCOS = 12345-0123-01

 - ✗ Uploading a file type other than text**
 - ✗ Invalid or non-printable characters**

- **Issues include, but are not limited to:**
 - ✗ Incorrect zero fill in NDC entries**
 - ✗ Submission of NDCs not in the dictionary or not reportable**
 - ✗ Uploading a file type other than text**
 - ✗ Invalid or non-printable characters**

- ❖ **Additional information regarding properly formatting text files is getting proper approval for distribution**

YEAR-END INVENTORY CONFUSION

- **Unless a substance becomes ARCOS reportable during the year and an “initial inventory” of that drug is required, the only inventory reported to ARCOS is end-of-year**
- **End-of-year inventory is separate from YERS (Quota) and should be included in the 4th quarter or December ARCOS submission**

- **Know what the NDC you are using represents ... for example:**
 - **Are you attempting to report a raw material by weight using a finished package NDC?**
 - **Are you using a finished package NDC to report individual units?**
 - **Does the product have both inner and outer package NDCs?**

- **Know what the NDC you are using represents ... for example:**
 - **Are you using an NDC you found on our website because it looks like it matches the product in your transaction?**
 - **Is the drug ARCOS reportable?**

- **Know what the NDC you are using represents ... for example:**
- **Dosage form NDCs cannot be used to report weight of raw material and vice versa; contact us if a product does not have an NDC assigned**

EXCLUDING ACTIVITIES

- **Keep in mind that ARCOS is a ledger system of pluses and minuses, with the end-of-year inventory providing the starting point for the following year**
- **Make sure you are reporting both increases and decreases to inventory, whether a financial transaction is involved or not**

EXCLUDING ACTIVITIES

- **Don't forget to report your end-of-year inventory of ARCOS reportable controlled substances; report Code "8" if there was nothing reportable on hand**
- **Be sure to report Code "7" for any reporting period during which there was no ARCOS reportable activity (increases, decreases, or manufacturing)**

UNCORRECTED ERROR TRANSACTIONS

- **Error transactions represent data that could not be processed for a variety of reasons, and it is the responsibility of the reporter to correct these errors**
- **Complete and accurate reporting is required under the Controlled Substances Act (U.S.C. § 827(a))**

Analysis of Uncorrected Error Transactions (submitted 1/1/2023 – 12/31/2024)

- **17,181 uncorrected error transactions**
- **17,902 individual errors**

ISSUE	# ERRORS	% TOTAL ERRORS
Trans Date	10,125	57%
NDC	3,359	19%
Order Form	1,164	7%
Unit	758	4%
Strength	726	4%
Associate	709	4%
Quantity	592	3%
Trans ID/Transaction Length	462	3%
Trans Code	7	< 1%

- **Make sure your supplier's or customer's DEA registration number has not changed; avoid accidentally reporting a transaction to or from a retired registration or a registration not authorized to handle a drug schedule**

BOGUS ORDER FORM NUMBERS

- **Please do not make up 9-digit numbers to submit a C-I or C-II transaction**
- **If you have questions regarding an order form number, please contact your local office for a solution**

UPDATING CONTACT INFORMATION

- **Send an email to ARCOS_Unit@dea.gov**
- **Use the “Manage Participant Data” feature in the ARCOS Online system**
- **ARCOS contact information is not automatically updated from other systems**

- **ARCOS point of contact should be the individual you want notified of submission problems, confirmations of submission, uncorrected errors, and any other ARCOS related correspondence for a specific registration**

CONVERSION FACTOR CONFUSION

- **Conversion factors are built into NDCs**
- **For example:**

NDC 63629-8526-01
OXYCODONE HCL 15MG TABLET; 100 TAB BOTTLE
0.015 GRAM x 0.8965 x 100
= 1.34475 GRAM OXYCODONE BASE

**** You would just report the number of packages**

CONVERSION FACTOR CONFUSION

- **Conversion factors are built into NDCs**
- **Another example:**

NDC 82393-0123-**
HYDROCODONE BITARTRATE; BULK
1 GRAM MATERIAL = 0.8965 GRAM BASE

**** You would just report the weight of material**

SUBMITTING TRANSACTIONS MULTIPLE TIMES

- **Avoid resubmitting transactions that were already successfully processed**
- **If you need to add transactions to a reporting period, either submit only those transactions in another report for that period or insert them in a future report**

What is ARCOS and What Does it Do?

The Controlled Substances Act of 1970 (§ 827) created the requirement for Manufacturers and Distributors to report their controlled substances transactions to the Attorney General. The Attorney General delegates this authority to the Drug Enforcement Administration (DEA).

ARCOS is an automated, comprehensive drug reporting system which monitors the flow of DEA controlled substances from their point of manufacture through commercial distribution channels to point of sale or distribution at the dispensing/retail level – hospitals, retail pharmacies, practitioners, mid-level practitioners, and teaching institutions. Included in the list of controlled substance transactions tracked by ARCOS are the following: All Schedules I and II materials (manufacturers and distributors); Schedule III narcotic and gamma-hydroxybutyric acid (GHB) materials (manufacturers and distributors); and selected Schedule III and IV psychotropic drugs (manufacturers only).

ARCOS accumulates these transactions which are then summarized into reports which give investigators in Federal and state government agencies information which can then be used to identify the diversion of controlled substances into illicit channels of distribution. The information on drug distribution is used throughout the United States (U.S.) by U.S. Attorneys and DEA investigators to strengthen criminal cases in the courts.
